REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The closest prior art, Black, does not teach particulate celecoxib having a distribution particle sizes such that D_{90} of the particles is less than 200 μm . The celecoxib particulate is in intimate mixture with one or more excipients. The specific particle distribution results in a relative bioavailability of not less than about 50% by comparison with an orally delivered solution containing celecoxib at the same dosage rate. The specification shows that the claimed celecoxib particle with a particular particle size distribution exhibits advantageous results over the prior art celecoxib formulations, such as: improved solubility, shorter disintegration and dissolution time, decreased tablet friability, increase tablet hardness, improved wettability, improved compressibility, improved physical stability of the finished product, improved blend uniformity, and reduced tablet or capsule size (page 3).

Claims 1-10, 12-50, 72-75, 84, and 86-90 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
